

FROM SUFFICIENT TO EFFICIENT

THE VISION

Gradual Transition to Industry 4.0

THE REALITY

Only **8%** out of 64M machines worldwide are network connected¹

+ Average factory overall equipment effectiveness (OEE) is **60%**²

+ Cost of unplanned manufacturing downtime is **\$56B/Year**³

DIGITALIZATION, PLUG & PLAY

The 3d Signals solution accelerates digital transformation and enables visibility into production floors. Using non-invasive sensors and a cloud-based asset performance monitoring platform, this solution generates powerful insights for more than 30% increased productivity, and reduced labor and energy costs.

Hassle Free

We do everything, from connecting the machines, to providing actionable insights.

Accuracy

Our solution was proven to be more accurate than machine's 24V controllers.

Fast Insights

Machine digitalization in less than an hour. Real time performance data from day 1.

Security

No digital connectivity with machine controllers for maximum cyber security.

Interoperability

Our solution is machine agnostic and provides one dashboard for all assets.

Growing Value

Supporting your growing needs, adding new software capabilities on existing hardware.

REAL-TIME VISIBILITY & ACTIONABLE INSIGHTS

The Hardware **dEDGE**

A data acquisition platform that collects data from a wide range of inputs including acoustic, vibration and current sensors. Data is uploaded to the cloud 24/7 for visualization and analysis.

"Proven to improve asset productivity by >30% in 3 months"

The system is quick and easy to install, and provides valuable information to the teams on the shop floor. Through better visualization & utilization we have been able to significantly reduce our operating costs."

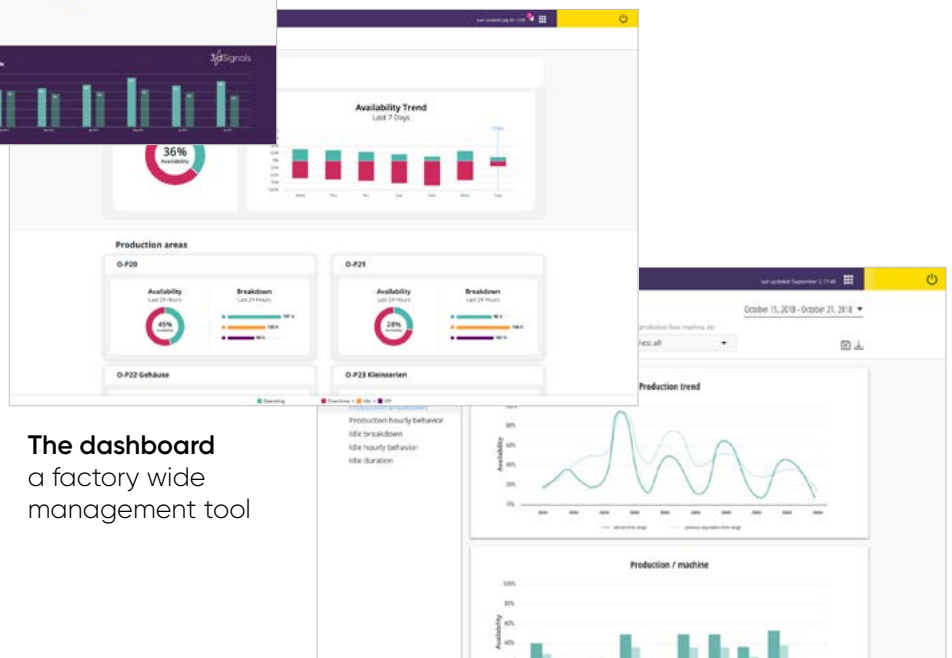

The Software **dVIEW**

Public view
real-time performance status

Live view
current and historic availability status (per floor & per machine)

The dashboard
a factory wide management tool

Customizable Reports & Alerts
for business intelligence and actionable insights
